3. Resumen ejecutivo

Este es el documento de análisis sobre este proyecto de Acme Life-Long Learning, Inc. perteneciente a la tercera entrega del grupo C1.03.08 de la asignatura de Diseño y Pruebas II.

4. Introducción

En éste documento se expondrán análisis individuales de los diferentes requisitos del sistema.

5. Contenidos

Requisitos realizados:

- **D03.04: Operations by administrators on the system configuration:**
 - Show the system configuration.
 - Update the system configuration.
- **D03.17: [MANDATORY] Operations by any principals on peeps:**
 - List the peeps and show their details.
 - Publish a peep. By default, the nick must be kept blank if the principal is anonymous; otherwise, it must be filled with the principal's full name; anyway, it can be changed at will.
- **D03.06: [MANDATORY] Operations by any principals on banners:**
 - Display any of them randomly, as long as its display period are active; the banners must be shown in every page as little intrusively as possible.
- **D03.07: [MANDATORY] Operations by administrators on banners:**
 - List the banners and show their details.
 - Create, update, or delete a banner.
- **D03.22: [MANDATORY] Moments, money amounts, and Booleans must be internationalized when they are shown. Other kinds of data are not expected to be internationalized. This requirement must be fulfilled in this and every subsequent group or individual deliverable.**
- **D03.08: The system must show money amounts as they are entered by the users, but also their corresponding money exchanges according to the system currency if their known exchange ratios are recent. It is the students' responsibility to find the appropriate exchange-rate service; no implicit or explicit liabilities shall be covered by the University of Seville or their individual affiliates if the students hire pay-per-use services! This requirement must be fulfilled in this and every subsequent group or individual deliverable for it to be considered fulfilled.**
- **D03.23: Produce an analysis report.**

Se ha creado el documento de análisis de grupo mediante la plantilla y las explicaciones de los anexos. En el documento aparece una pequeña descripción de cómo se ha realizado cada tarea.
- **D03.24: Produce a planning report.**

Se ha creado el documento de plan de grupo mediante la plantilla y las explicaciones de los anexos. En el documento aparece una tabla con indicaciones de las tareas a realizar, la persona o personas asignadas a dicha tarea junto con su rol o roles, el tiempo estimado, y el tiempo empleado.

Requisitos no realizados:

- **D03.18: Operations by authenticated principals on bulletins:**
 - List the bulletins and show their details.
- **D03.19: Operations by administrators on bulletins:**
 - Post a bulletin. This operation requires confirmation because bulletins cannot be updated or deleted.
- **D03.05: Operations by authenticated principals on offers:**
 - List the offers in the system and show their details.
- **D03.20: Operations by administrators on offers:**
 - List the offers in the system and show their details.
 - Post, update or delete an offer.
- **D03.21: Operations by authenticated principals on notes:**
 - List the notes that are not older than one month and show their details.
 - Post a note. This operation requires confirmation because notes cannot be updated or deleted.
- **D03.09: The system must prevent the principals from storing any data that can be considered spam. A piece of text is considered spam if the number of spam terms exceeds a predefined spam threshold. The default list of spam terms includes the following ones: "sex", "viagra", "cialis", "one million", "you've won", "nigeria", and their corresponding translations into the languages considered for internationalization; the default spam threshold is 10%. Note that the previous default values can be changed at will by the administrators. Realize that a term must be considered spam irrespective of its case and the blanks in between its words; for instance, "one_million" is a spam term that matches "one_million", "ONE_MILLION", "OnE_MiLLiOn", or "One_ Million"; it doesn't match "One_Millionaire", "One_or_two_millions", or "One_sex_million", though. The spam detector must be reusable across different projects; that is: it must be implemented as an independent project that must be packaged into a reusable dependency. Do not forget to deliver your spam detector project so that it can also be evaluated or, otherwise, this requirement shall not be considered fulfilled. This requirement must be fulfilled in this and every subsequent group or individual deliverable.**

6. Conclusión

En conclusión en esta entrega se han dejado bastantes requisitos sin completar por falta de tiempo, estos requisitos serán completados antes de que se realice la entrega final del proyecto.

7. Bibliografía

Intencionadamente en blanco.
